

mLINQS has developed a Reporting Portal that provides our government customers with a comprehensive enhancement of reporting in the company's moveLINQ Employee Relocation Expense Management system. The portal is built on advanced technologies that are transparent to users, and leverages authorization controls to enforce security. Our Reporting Portal features comprehensive and extremely flexible reports that can be fully customized by users.

Robust Custom Reporting Features

- User configurable dashboards, reports, and visual business analytics
- Real-time, self-service reporting capabilities
- Report scheduling with automatic distribution
- Custom reports include content filtering, formatting, sorting, grouping and aggregation
- Transforms tabular data into visualizations, i.e. charts, graphs, and heat maps
- Export capabilities to Excel, CSV and PDF

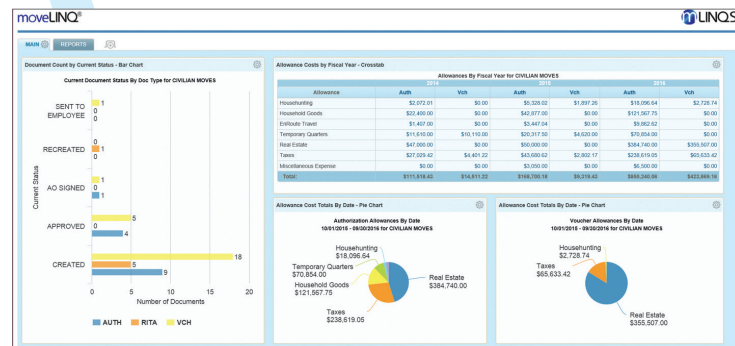

Reporting Portal Drill Down Report

Reporting Portal Benefits

- Summarizes and aggregates important data into insightful graphical charts
- Customers create critical dashboards and reports easily to become self-reliant
- Agencies can focus on business delivery, not creating obsolete manual reports
- Simplifies trending analyses for budgeting and policy decisions
- Greater visibility into and control over enterprise level relocation cost data
- Enables prompt responses to FOIA requests

mLINQS Delivers Results

The moveLINQ Reporting Portal was developed in-house by mLINQS. Experienced mLINQS staff provides all implementation, training, upgrade, and enhancement services. This enables our customers to have a single point of contact for any support they may need, anytime, anywhere. Our commitment to service is what has made mLINQS the industry leader in government relocation expense management.
