FOR IMMEDIATE RELEASE

mLINQS Approved To Manage Federal Relocation
Expense Management From The Cloud

FAIRFAX, VA – (May 14, 2013) – mLINQS, LLC today announced the company's Software as a Service (SaaS) offering, a Cloud solution featuring all of the functionality of its moveLINQ government relocation expense management system, has been granted federal authority to operate as a hosted service. The hosted version of moveLINQ complies with all applicable standards, including OMB and National Institute of Standards and Technology (NIST) guidelines.

"By receiving authorization, we've taken the next step to ensure moveLINQ will remain the industry leader for managing federal relocation costs," said Greg McIntyre, mLINQS president. "Government agencies have been using our moveLINQ standalone system to manage their employees' moves nationally and internationally for nine years. The hosted offering streamlines implementation. It automatically maintains relocation data and provides updates for per diem rates with ironclad security in an even more cost-effective package."

According to the authority to operate report, "The independent Information Assurance Team using the verification techniques tested the security controls listed in the (mLINQS) ST&E and the Security Plan to determine if those controls are identified, implemented, and effective in their application." Further, the report noted that the mLINQS SaaS offering includes compliance with the general requirements of OMB Circular A-130, Appendix III, with the minimum security requirements defined for moderate impact information systems in accordance with Federal Information Processing Standard (FIPS) 199, and NIST Special Publication 800-53.

All expenses associated with federal employee relocation are managed electronically by moveLINQ, the first and only fully compliant, Web-based government relocation expense management system. System development, enhancements, training and support are provided by the mLINQS in-house staff. A select group of customers has been able to use the SaaS version 24/7 since 2011 under federal "interim authorities to operate." moveLINQ is currently used to support relocation for the employees of over 30 federal agencies.

Further information about all mLINQS government products, services and GSA Schedules is available by calling 703-425-1122, or visiting www.mlinqs.net. Federal employees can follow mLINQS on Twitter, Facebook and LinkedIn.
